**THE 2030  
PHARMACY  
EXPERIENCE**

## The Future of Pharmacy

A Bold Look 10 Years into the Future

Join us in Houston August 7-8, 2020

*Creating the Pharmacy of the Future begins NOW*

Exemplar Healthcare Partnership Organization in conjunction with GRX Marketing, Waypoint Rx, InventoryIQ, OptiYouRx and Porterfield & Company CPA's introduce the 2030 Pharmacy Experience - a networking event and paradigm-challenging concept that will encourage you to turn your pharmacy into the revenue producing machine it was designed to be while maintaining the customer care that your customers want.

You will network with vendors that provide cutting edge technologies, specialized processes and broaden the horizons of your pharmacy putting you back in control of the bottom line of care.

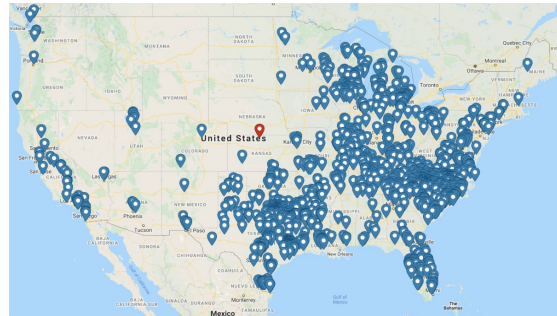

Join us in Houston, TX August 7-8th at the **Hilton Houston Galleria Area Hotel**. More information can be found [here](#).

# EXEMPLAR

HEALTH BENEFITS ADMINISTRATOR

## Have you heard?

EHBA's clinical approach is one that allows its clients to choose from a suite of services that best meets the needs of their associates. With our emphasis on lowering overall medical costs, we aim to deliver healthcare at the maximum level!

EHBA in conjunction with our Health Plan, Exemplar Advantage allows Clinical Pharmacists and PharmD's to be providers, which allows them to ***invoice and be reimbursed for services that include CMS preventive care screenings.***

As you probably know, preventive screenings help diagnosis and treat common medical conditions that in many cases are overlooked and lead to employers being faced with costly medical expenses. Not only can Clinical Pharmacists and PharmD's provide preventive screenings, EHBA also reimburses them for additional educational treatment programs when applicable.

**EHBA is not asking employers to buy insurance, we are asking them to *INVEST* in their employee's healthcare!**

**Contact us** today so we can show you how.

## June is Alzheimer's Awareness Month

### What is Alzheimer's disease?

Alzheimer's disease is a progressive form of dementia. Dementia is a broader term for conditions caused by brain injuries or diseases that negatively affect memory, thinking, and behavior. These changes interfere with daily living. According to the Alzheimer's Association, Alzheimer's disease accounts for 60 to 80 percent of dementia cases. Most people with the disease get a diagnosis after age 65. If it's diagnosed before then, it's generally referred to as early onset Alzheimer's disease.

There's no cure for Alzheimer's, but there are treatments that can slow the progression of the disease.

### Alzheimer's facts

Although many people have heard of Alzheimer's disease, some aren't sure exactly what it is. Here are some facts about this condition:

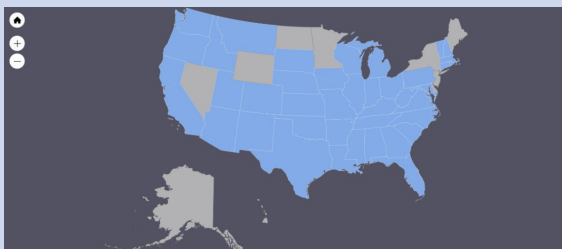

- Alzheimer's disease is a chronic ongoing condition.
- Its symptoms come on gradually and the effects on the brain are degenerative, meaning they cause slow decline.
- There's no cure for Alzheimer's but treatment can help slow the progression of the disease and may improve quality of life.
- Anyone can get Alzheimer's disease but certain people are at higher risk for it. This includes people over age 65 and those with a family history of the condition.
- Alzheimer's and dementia aren't the same thing. Alzheimer's disease is a type of dementia.
- There's no single expected outcome for people with Alzheimer's. Some people live a long time with mild cognitive damage, while others experience a more rapid onset of symptoms and quicker disease progression.

Each person's journey with Alzheimer's disease is different.
